CHALLENGE NAME : TRY HACK ME

DEV : AMRUTA PATIL

CATEGORY : OSINT

LEVEL : MEDIUM

2024

विश्वकर्माCTF

**Description :** TryHackMe is a browser-based cyber security training platform, with learning content covering all skill levels from the complete beginner to the seasoned hacker.

One of our team member is very active on the platform. Recently, I got to know that he comes under 3% in the global leaderboard. Impressive isn't it.

Maybe you should have a look at his profile

PS : He keeps his digital identity very simple. No fancy usernames. It's just a simple mathematics

His real name == His username

**Solution :** The description says one of the member of the team member of CyberCell VIIT is very active on Try Hack Me and ranks in top 3% of the global leaderboard and we need to check for his Try Hack Me profile.

We can find all the members of the team on official website <https://vishwactf.com/> in the **Our Heroes** tab

We can see 6 members in Core Committee, 39 members in tech team and 17 members in the non-tech team. Also each members social account is also been provided.

Analysing each member's account we can find **Ankush Kaudi's** linkedin mentions he is in top 3% of the global rankings in Try Hack Me.

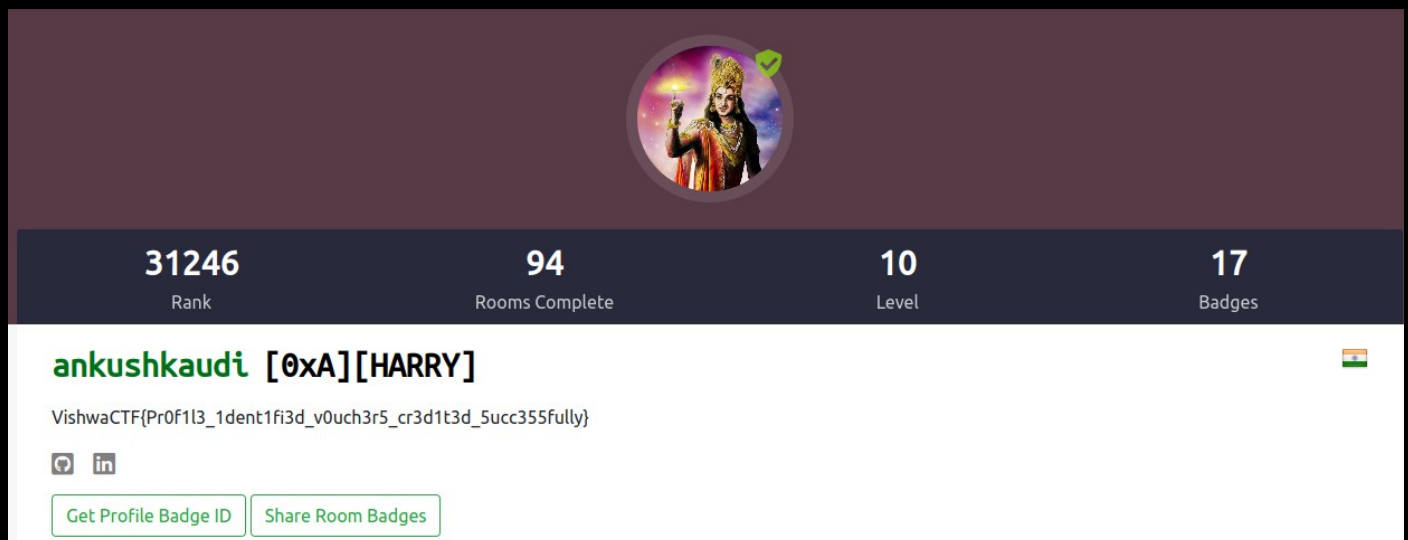

So we have the team member, we just need to find his Try Hack Me profile. We can see if we search for any person's profile, we can't access the profile easily. But if we observe the search url for Try Hack Me, it works as follows :

[https://tryhackme.com/p/\[username\]](https://tryhackme.com/p/[username])

It has been mentioned in description that username and real name are the same. So searching for the same we can see the profile.

<https://tryhackme.com/p/ankushkaudi>

Hence, we can find the flag
